Coping with Stress

Many of us are facing challenges that can be stressful and overwhelming. **Learning to cope with stress in a healthy way will help you, the people you care about, and those around you become more resilient.**

Stress can cause the following:

- Feelings of fear, anger, sadness, worry, numbness, or frustration.
- Changes in appetite, energy, desires, and interests.
- Trouble concentrating and making decisions.
- Nightmares or problems sleeping.
- Physical reactions, such as headaches, body pains, stomach problems, or skin rashes.
- Worsening of chronic health problems and mental health conditions.
- Increased use of [alcohol](#), illegal drugs (like [heroin](#), [cocaine](#), or [methamphetamine](#)), and misuse of prescription drugs (like opioids).

Need Support Now?

- If you or someone you know is struggling or in crisis, help is available. [Call](#) or [text](#) 988 or chat [988lifeline.org](#) [↗](#)
- [Disaster Distress Helpline](#) [↗](#) : CALL or TEXT 1-800-985-5990 (press 2 for Spanish)

Healthy Ways to Cope with Stress

#BeThe1To

If you think someone might be considering suicide, be the one to help them by taking these 5 steps:

ASK. KEEP THEM SAFE. BE THERE. HELP THEM CONNECT. FOLLOW UP.

Find out why this can save a life at
www.BeThe1To.com

If you're struggling, call the Lifeline at
988

Here are some ways you can manage stress, anxiety, grief, or worry:

- **Take breaks from news stories**, including those on social media. It's good to be informed, but constant information about negative events can be upsetting. Consider limiting news to just a couple times a day and disconnecting from phone, TV, and computer screens for a while.
- **Take care of your body**: Staying physically healthy can improve your emotional well-being. Here are some ways to improve your health:
 - **Eat healthy**. Have fruits and vegetables, lean protein, whole grains, and low-fat or no-fat dairy. Limit foods with unhealthy fats, salt, and added sugars. [See Healthy Eating Tips](#).
 - **Get enough sleep**. Go to bed and wake up at the same time each day to help you [sleep better](#). Adults need 7 or more hours per night.
 - **Move more and sit less**. Every little bit of physical activity helps. Start small and build up to 2 ½ hours a week. You can break it into smaller amounts such as 20 to 30 minutes a day.
- **Limit alcohol intake**. Choose not to drink, or drink in moderation on days you drink alcohol. Moderation means having 2 drinks or less a day for men or 1 drink or less for women. Find out more at [Drink Less, Be Your Best](#).
- **Avoid using illegal drugs or prescription drugs** in ways other than prescribed. Don't take someone else's prescription. [Substance use treatment](#) [↗](#) is available, and recovery starts with asking for help.
- **Avoid smoking**, vaping, and the use of other tobacco products. People can and do [quit smoking](#) for good.
- **Continue with regular health appointments, tests, screenings, and vaccinations.**
- **Make time to unwind.**
 - Take deep breaths, stretch, or [meditate](#) [↗](#) .
 - Try to do some other activities you enjoy.
- **Connect with others.**
 - [Talk with people](#) you trust about your concerns and how you are feeling.
 - Connect with your community-based or faith-based organizations.
